WINTER MAINTENANCE

At the Genesee County Road Commission, winter means salting and plowing roads. The GCRC spends up to \$1,500,000 on salt and uses about 22,000 tons each year. The Road Commission also creates more than 200,000 gallons of an anti-icing brine mixture on site.

The GCRC sets plowing and salting priorities according to traffic volumes and safety risks. Roads with higher traffic volumes and higher speeds are cleared before roads with less traffic and slower speeds.

Make sure you watch out for our trucks and snow plowing equipment. The large equipment is more difficult to drive than a passenger vehicle. Our staff is specially trained to

operate these vehicles, but they still need extra braking room during bad weather.

SPEED LIMIT FOR WORK ZONES

In Michigan, you risk more than a speeding ticket if you go too fast in a work zone. You could also face tough penalties.

Fines are doubled in work zones. Andy's Law created penalties of up to one year in prison for injuring and up to 15 years in prison for killing a worker. This law imposes a maximum penalty of \$7,500.

The number of points on your driving record increases the

Slow down in work zones

- Pay attention to barrels, cones, signs and flag control
- Don't speed
- Put away your cell phone while driving

- Be patient
- Always stay alert
- Don't tailgate

WHERE DOES THE GCRC GET ITS FUNDING?

The primary source of revenue to the Genesee County Road Commission comes from the Michigan Transportation Fund (MTF). All state fuel taxes and vehicle registration fees are deposited into the MTF. The MTF also funds MDOT and Michigan's cities and villages. Your property taxes do not fund the Genesee County Road Commission.

The state fuel tax is 27.2 cents a gallon (in 2022) and increases each year based on inflation. Some federal fuel tax revenues are available, but the bulk of these go to MDOT for their projects.
