- Unless construction operations and pole installations are performed under provisions of an approved performance agreement, a performance deposit may be required to assure highway restoration and/or protection. The amount of that deposit will be determined during review and may be equal to the estimated cost of the proposed work in the Right of Way plus restoration costs.
- Lineal measurements shall be based on engineering plans, diagrams or other approved documentation furnished with the permit application for those portions of the installation within the highway right-of-way under the jurisdiction of the Genesee County Road Commission.
- Permit fees are to be paid at time of application beginning January 1, 2020. Permit fees are considered an application fee. The payment of the fee does not constitute an obligation by the Genesee County Road Commission to issue a permit and are nonrefundable should the permit be denied. Performance deposits and similar charges must be paid before the permit is issued, unless other acceptable arrangements are made at the time of issuance. Permits requiring inspection reimbursement may have an escrow account established to draft inspection expenses from.
- Governmental agencies, although not required to pay a permit fee, may in some instances be required to file a performance deposit.
- Performance Deposits shall be Cash Bond, Irrevocable Letter of Credit, or Surety Bond and will be held in force a minimum of 1 year following completion of work.
- Checks should be made payable to the Genesee County Road Commission
- Residential applications are taken over the phone 810-767-4920 ext 246
- Commercial applications require a review fee and 2 complete sets of site plans.
- All other proposed work within the Right of Way must include 2 complete sets of plans with each application.
- All fees are each unless otherwise noted in the schedule.
