Construction on Hill Road at US-23 Continues

Construction on Hill Road near the US-23 interchange is continuing. Westbound Hill Road is reduced to one lane from Van Slyke Road to US-23. This work is estimated to be completed around November 1st. The work being performed is a right turn lane for the northbound US-23 entrance. Work includes utility relocation, sidewalk relocation, retaining wall and pavement construction. We kindly remind motorists to please refrain from entering intersections when the traffic ahead has not yet cleared. Motorists are also encouraged to allow themselves some extra time to reach their destinations. This work is in conjunction with the new LaFontaine Way and Birch Drive Extension project. Thank you for your cooperation.

Work zones are temporary. - Actions behind the wheel can last forever.
